TEST COMMENTS:

This has been a very productive field over the years we have been doing FIRST trials on Paul's farms. Although this area ended about 4" short of the 30-yr average for the growing season, irrigation supplemented any water deficits. Ideal weather following planting delivered excellent plant establishment. Plants were tall and healthy at harvest with some still retaining a little green. Many ears were 18 rows around and long but ear shanks and stalks were strong. No lodging was noted.
